

## Solutions for the safe transport of critical liquids

### ADVANTAGES

- International transport approval
- Robust pressure vessels
- Reliable tightness & chemical resistance
- Easy & contamination-free dispensing
- Ecological, durable & reusable

### TYPICAL LIQUIDS

- Raw materials and reagents for drug production
- Fine chemicals and solvents for life sciences
- Ultra-pure process media for the semiconductor industry

Hazardous liquids

## Specialty Chemicals Logistics

**WILHELM SCHMIDT**  
containers for critical fluids

Hazardous liquids

## Specialty Chemicals Logistics

**WILHELM SCHMIDT transport systems** are used to built-up safe and sustainable supply chains for dangerous goods. All products have excellent references as reusable and protective packaging with ecological and economic benefits.

Our products are designed for the specific transport regulations and purity levels of various chemicals. Stainless steel guarantees contamination-free storage and an almost infinite service life. Dedicated accessories enable easy filling and dispensing.

## Transport Systems

### STAINLESS STEEL BOTTLES UN 1A1\*

0.025 – 30 liters

Type series G, H, L, M

### OPEN DRUMS UN 1A1

10 – 200 liters

Type series T

### CLOSED DRUMS UN 1A1

10 – 200 liters

Type series K

### FLANGE CONTAINER UN 1A1

1 – 400 liters

Type series F

### IBC UN 31 A/Y

500 – 1,400 liters

Type series IBC

### TANK ADR/RID/IMDG

1,000 liters

Type series Tank
